SUMMARY

Learning leader who builds content systems, not just content. A decade turning technical and creative subject matter into experiences that actually teach -- and a refusal to accept engagement metrics as a proxy for whether anyone got better. At Apple, owned the learning platform behind 145+ internal teams, set the quality bar that let those teams author independently without it turning to noise, and coached instructional designers away from click-through courseware toward learning that respects the learner's time and intelligence. Now building AI-native learning products with Claude -- an adaptive tutor and an interactive portfolio -- that encode that craft into systems rather than guarding it.

EXPERIENCE

L&D Producer, Learning Platform Product Owner

2021 - Present

Apple University - San Francisco, CA

- Set and defended the quality bar for a distributed authoring model that let 145+ teams produce their own learning -- precise enough that self-serve scale didn't become noise.
- Coached instructional designers away from click-through, compliance-style courseware toward experiences grounded in adult learning theory that meet learners where they are.
- Built a learning measurement system -- a structured feedback cadence aggregated into a dashboard alongside adoption and support signals -- and closed the loop by feeding results back into the roadmap.
- Cut time-to-productivity 50%+ for newly onboarded teams by replacing fragmented manual workflows with a unified self-serve onboarding experience.
- Navigated the tension between stakeholder demand for broader access to learner data and privacy-conscious governance, implementing access controls with security and data engineering teams.
- Architected the content and platform function from nothing -- no precedent, no template -- in a high-ambiguity environment.

Creative Pro / Lead Creative

2012 - 2021

Apple - Retail

- Taught technical and creative subjects -- coding, video, audio, photography -- to thousands of learners from first-timers to working professionals, adapting the same material across radically different levels.
- Built and owned an external cultural partnership: a two-year monthly Art Walk series (2018-2020) with the Bellevue Arts Museum, planning sessions and leading public groups who used Apple technology for creative practice.
- Ran coding sessions for K-12 school groups across multiple districts; mentored junior team members and contributed to regional training initiatives.

Store Leader & Market Training Lead

2004 - 2012

Starbucks - Seattle, WA

- Designed and delivered multi-unit training curriculum across a regional market -- building materials adopted market-wide and measuring outcomes against operational KPIs.
- As Store Leader, owned full P&L and led a team of 25+.
- Drove Lean Thinking adoption across the Portland and Seattle markets, and learned firsthand the tension between scaling a system and preserving what made it worth scaling.

Gallery Coordinator

2002 - 2004

Viking Union Gallery, Western Washington University - Bellingham, WA

- Curated and produced international exhibitions; managed public programming and stakeholder relationships at a mission-driven arts institution -- early training in audience-centered design.

PROJECTS

Adaptive Tutor

2026

adaptive-tutor-ruddy.vercel.app

A working argument for what an adaptive AI tutor should be. Every inference the system makes -- engagement, frustration, confusion, intent -- is shown to the learner in real time with its confidence capped below 100% on purpose, and the signals behind it. The learner can read, contest, and override any conclusion. Stack: React, Vite, Tailwind, Anthropic API, xAPI -> LRS.

learn-matthew-ai.vercel.app

Interactive AI-guided portfolio with streaming Claude responses, persona-based adaptive UX, and anonymous xAPI analytics -- demonstrating that personalization doesn't require harvesting personal data.

SKILLS

Content & Curriculum	Instructional design, curriculum architecture, quality standards, multi-format production (written, interactive), editorial judgment
Learning Science	Adult learning theory, ADDIE, Kirkpatrick evaluation, learning measurement & instrumentation, SCORM / xAPI
AI-Native Production	Building content with Claude, Anthropic API, prompt engineering, human-vs-AI line-drawing, adaptive/tutoring system design
Systems & Scale	Distributed authoring, 0-to-1 platform building, production workflow design, self-serve enablement at scale
Measurement	Dashboards, adoption analytics, feedback cadence design, SQL, Tableau, Snowflake, privacy-conscious data governance

EDUCATION

B.A., Integrated Social Sciences - University of Washington	2017 - 2018
Art History minor; coursework in Communications, Computer Science, and Mixed Media Studio Arts.	
Fine Art & Design studies - Western Washington University	1999 - 2004

CERTIFICATIONS

Kirkpatrick Bronze Level Certification - Kirkpatrick Partners (2025)
